● Assisted reproductive technologies

Diagnosis of antiphospholipid syndrome	50,00
An extended package of examinations before IVF for women	500,00
Advanced pre-IVF examination package for men	400,00
Standard package of examinations before IVF for women	350,00
Standard package of examinations before IVF for men	80,00
The minimum package of examinations before IVF for women	80,00
The minimum package of examinations before IVF for men	50,00
Examination package for women "Oocyte donor"	890,00
"Optimal" IVF treatment program	2 320,00
IVF treatment program "Optimal" full cycle	4 150,00
IVF treatment program using donor oocytes (at least 2 blastocysts) + NGS	5 780,00
IVF treatment program using donor oocytes (at least 4 blastocysts) + NGS	8 620,00
IVF treatment program using donor oocytes (at least 1 blastocyst)	3 240,00
IVF treatment program using donor oocytes (at least 2 blastocysts)	4 300,00
IVF treatment program using donor oocytes (at least 4 blastocysts)	6 420,00
IVF treatment program using oocytes from one's own donor	5 180,00
IVF treatment program using donor embryos (at least 1 blastocyst)	2 260,00
IVF treatment program using donor embryos that have undergone genetic screening by NGS (at least 1 blastocyst)	3 060,00

● Assisted reproductive technologies

Oocyte vitrification program	1 120,00
The oocyte vitrification program is a full cycle	2 820,00
IVF treatment program in a natural cycle	2 170,00
IVF treatment program in a segmented cycle	3 630,00
IVF treatment program "Trust"	11 380,00
IVF treatment program using vitrified embryos	1 150,00
The minimum package of examinations before IVF for men	50,00
Program of intrauterine insemination (IUI) with partner's sperm in a natural cycle	510,00
Intrauterine insemination (IUI) program with donor sperm in a natural cycle	1 170,00
Program of intrauterine insemination (IUI) with partner's sperm in a stimulated cycle	900,00
Program of intrauterine insemination (IUI) with donor sperm in a stimulated cycle	1 560,00
Ultrasound and hormonal monitoring of folliculogenesis and endometrial development	150,00
Ultrasound and hormonal monitoring of endometrial development	100,00
Ultrasound and hormonal monitoring of folliculogenesis	130,00
Ultrasound monitoring of ovulation	70,00
Ultrasound and hormonal monitoring of ovulation	110,00
Controlled ovarian stimulation	1 600,00
Controlled ovarian stimulation for intrauterine insemination	220,00

● Assisted reproductive technologies

Ovulation trigger	100,00
Drug support of the luteal phase before the pregnancy test	130,00
Drug support of the luteal phase before the pregnancy test for IUI	30,00
Medicinal preparation for transfer	310,00
Medical support of pregnancy up to 10 weeks	400,00
Medical support of pregnancy up to 20 weeks	850,00
Transvaginal puncture of ovarian follicles	610,00
Transfer of embryos into the uterine cavity	370,00
Intrauterine insemination (IUI) program with donor sperm in a natural cycle	1 170,00
Ovulation induction (with medication)	590,00
Intrauterine insemination (IUI) - 2 procedures	240,00
Reduction of embryos	530,00
Fluid aspiration in ascites	220,00
Aspiration of the endometrium with histological and immunohisto(cyto-) chemical studies under general anesthesia	860,00
Ovarian cyst aspiration with cytological examination under general anesthesia	540,00
Ultrasound assessment of fallopian tube patency (echosalpingography)	110,00
X-ray evaluation of fallopian tube patency (hysterosalpingography)	160,00
PRP therapy for the treatment of premature ovarian failure	580,00

● Assisted reproductive technologies

PRP therapy for endometrial growth	250,00
Scarification of the endometrium	70,00
IVF treatment using donor oocytes (at least 1 blastocyst)	1 140,00
IVF treatment using donor oocytes (at least 2 blastocysts)	2 100,00
IVF treatment using donor oocytes (at least 4 blastocysts)	4 020,00
IVF treatment using donor embryos (at least 1 blastocyst)	1 350,00
IVF treatment using oocytes from one's own donor	2 190,00
Infertility treatment using in vitro methods (set of 2 vitrified blastocysts)*	3 460,00
Infertility treatment using in vitro methods (set of 4 vitrified blastocysts)*	5 380,00

● Embryology

Insemination of oocytes by ICSI method and cultivation of embryos	810,00
Oocyte insemination ("convencional" IVF) and embryo cultivation	500,00
Selection of sperm by the PICSI method	220,00
Biopsy of the trophectoderm of embryos for the application of the NGS method	520,00
Embryo blastomeres biopsy (up to 12 embryos)	300,00
Auxiliary hatching	300,00
Examination of ejaculate (spermogram)	30,00

● Embryology

Determining the ability of spermatozoa to penetrate the egg shell	90,00
Preparation of sperm for insemination	100,00
Vitrification of oocytes / embryos 1 cryotop + storage 1 year	380,00
Additional cryotop + storage for 1 year	100,00
Cryopreservation of sperm (2 vials) + storage for 1 year	150,00
Thawing of biological material (embryo, oocyte)	240,00
Thawing the ejaculate sample	30,00
Cryopreservation (oocytes, embryos, sperm) 1 month	40,00
Cryopreservation (oocytes, embryos, sperm) for 1 year	370,00
Preparation for transportation of biological material	300,00

● Donor sperm

Treatment of infertility using donor sperm	300,00
Infertility treatment using donor sperm (open extended profile)	1 370,00
Treatment of infertility using donor sperm (open profile)	1 080,00

● Surrogate motherhood programs

Guaranteed program of surrogacy using donor eggs (before the birth of the child)	26 178,00
--	-----------

● Surrogate motherhood programs

Surrogacy program using cryopreserved embryos (2 FET)	12 168,00
Surrogacy program using cryopreserved embryos (4 FET)	14 468,00
Surrogacy package using cryopreserved 1ET embryos	2 350,00

● Molecular and genetic research

Pre-implantation genetic screening for 24 chromosomes of the embryo by NGS method	360,00
Determination of aneuploidy (24 chromosomes) from the villus material of the aborted chorion by the NGS method	380,00
Sequencing and storage of embryo DNA for pre-implantation genetic screening	230,00
Pre-implantation genetic screening for 24 chromosomes from a sequenced embryo using the NGS method	250,00
Examination of germ cells of ejaculate by FISH and TUNEL method	220,00
Karyotype analysis of peripheral blood lymphocytes (urgent)	230,00
Pre-implantation genetic diagnosis for 5 chromosomes (exclusion of aneuploidy of X, Y, 18, 13, 21st chromosomes by FISH method) (up to 4 embryos)	340,00
Surcharge for pre-implantation genetic diagnosis for 5 chromosomes for every 4 additional embryos	60,00
Preimplantation genetic diagnostics for 8 chromosomes (exclusion of aneuploidy X, Y, 18, 13, 21, 15, 16, 22nd chromosomes by FISH method) (up to 4 embryos)	680,00
Surcharge for pre-implantation genetic diagnosis for 8 chromosomes for every 4 additional embryos	110,00

● Gynecological care
